

► **CryptoRobotics** is a web, Windows, macOS and Android trading platform that enables users to trade simultaneously on multiple cryptocurrency exchanges and apply algorithmic or automated trading tools.

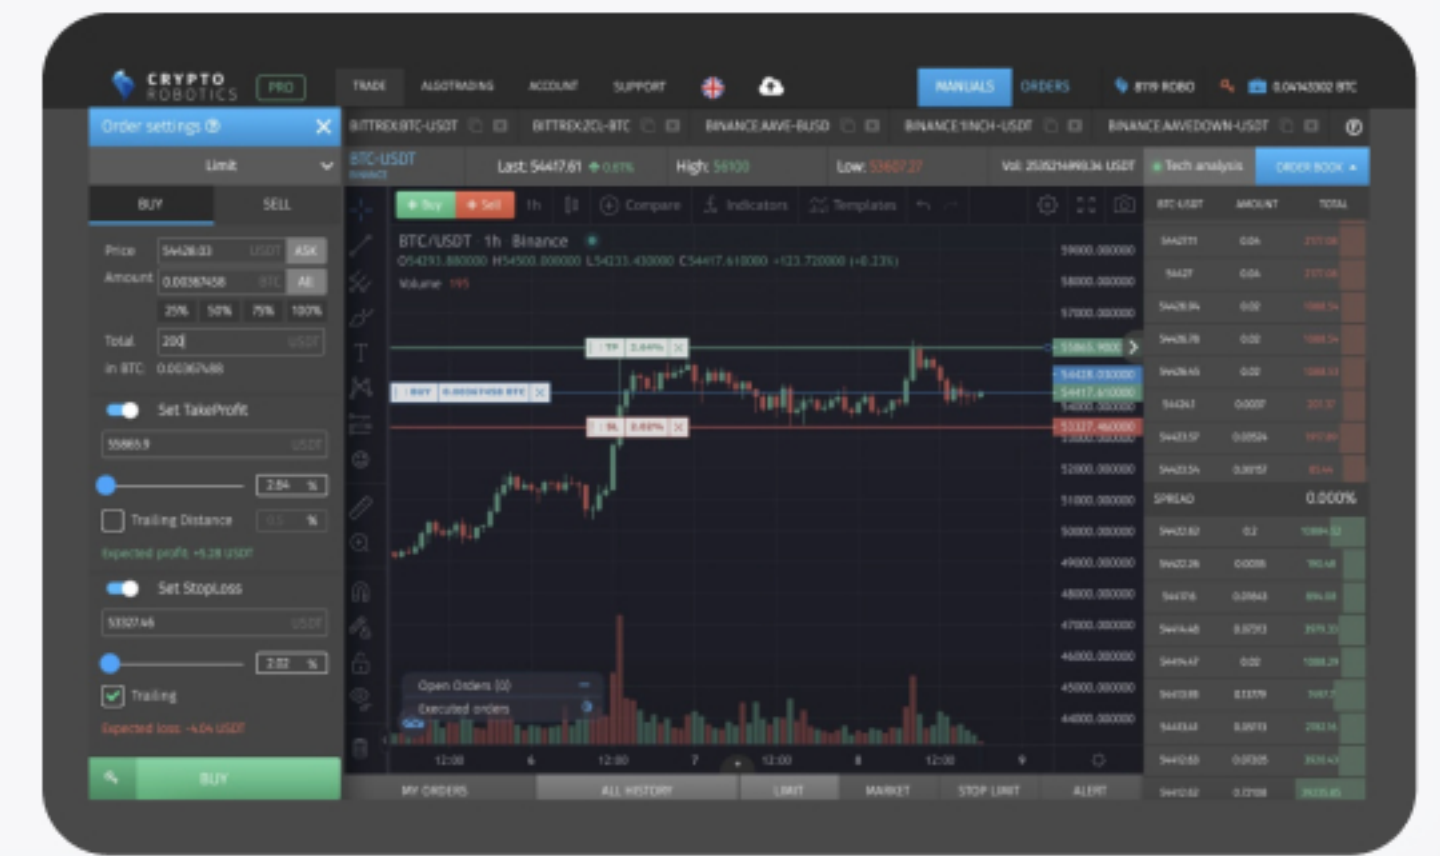

What we provide

→ Smart orders

See video overview:

OCOs:
One-Cancels-the-Other

The functionality of Smart Orders makes it possible to simultaneously place a limit order or a stop-limit buy or sell order and simultaneously set Stop Loss, Take Profit, Trailing stop parameters.

→ Signal Trading in one click

See video overview:

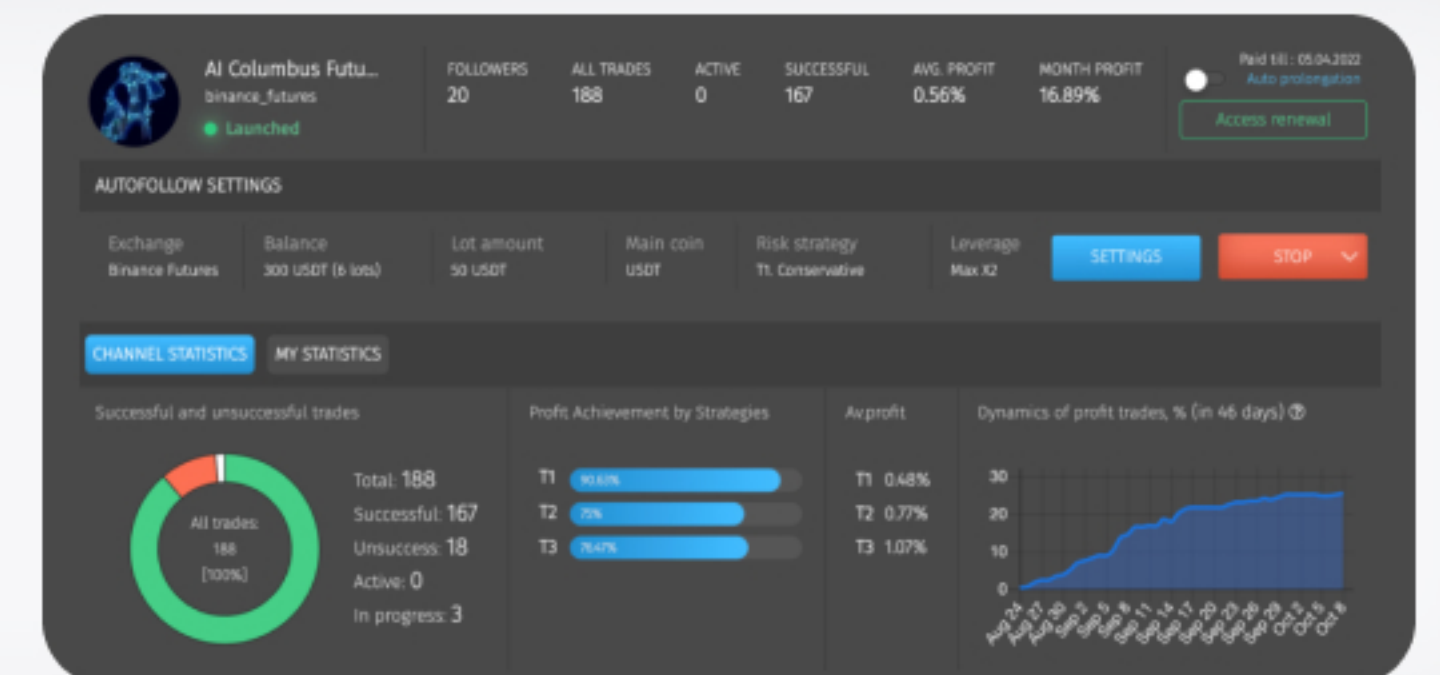

This service gives you an opportunity to follow signals of analysts in 1 or 2 clicks and observe their execution from a single interface.

→ Autofollowing

See video overview:

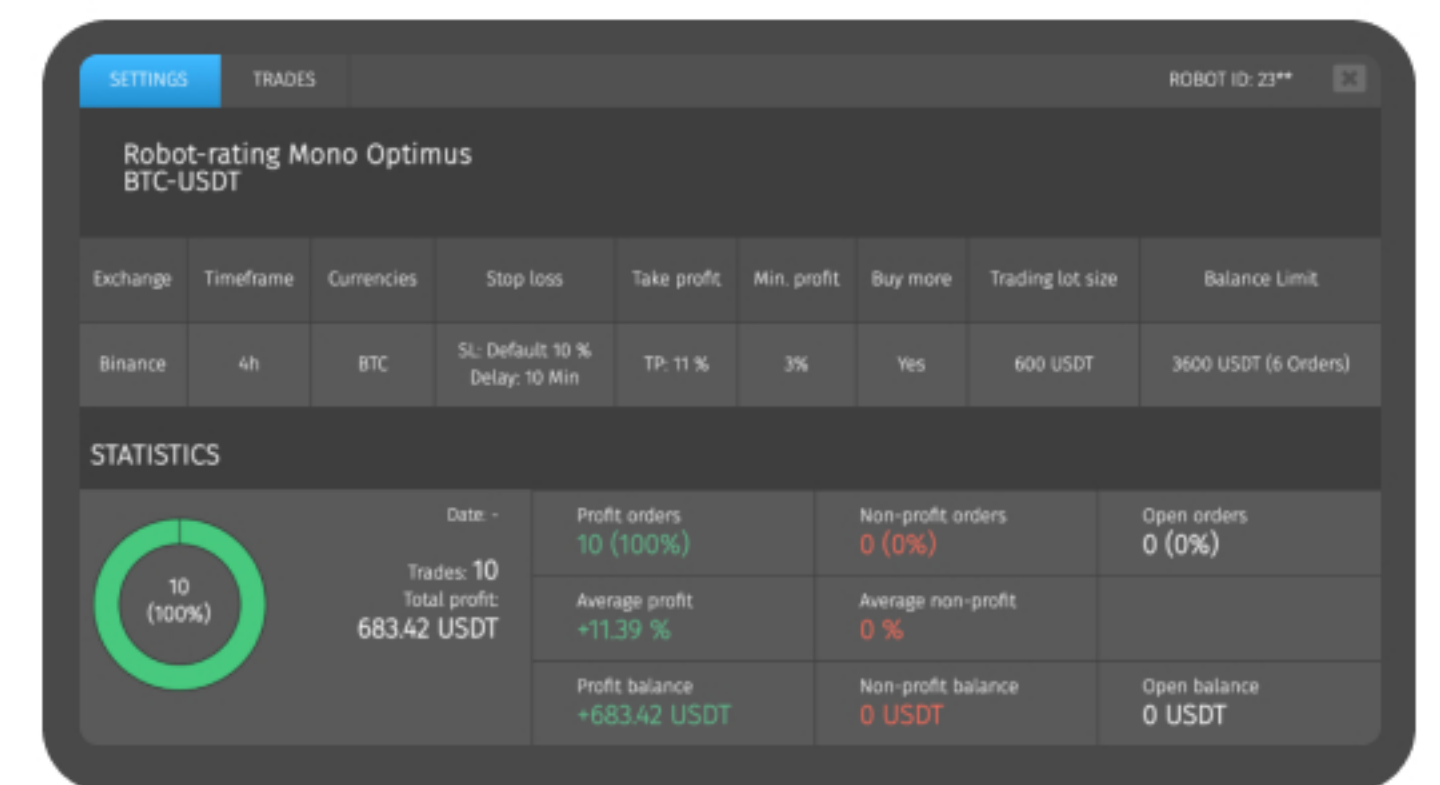

Autofollowing is a «signals + robot» tool. Signals are provided by the analyst, the robot processes the signals and makes trades.

→ Trading robots

See video overview:

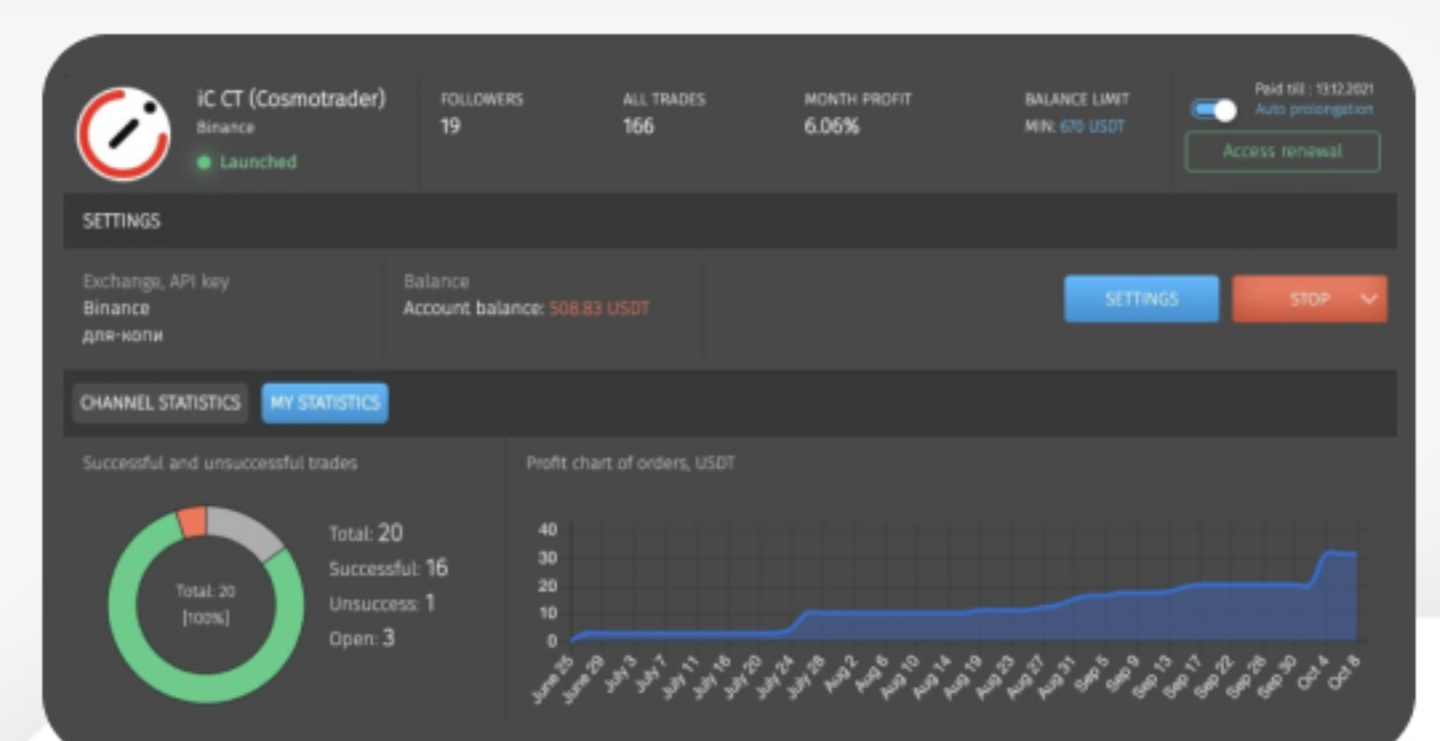

Robots enter trades on predictable market fluctuations, based on a number of oscillators and indicators, and exit them according to the established algorithm. This is a fully automated tool, which makes it possible for an user to limit his time expenditures while trading.

→ Copytrading

See video overview:

The service broadcasts the trader's operations directly from the exchange and allows users to automatically copy trading orders in equal proportions of the total trading balance.

▶ Signal Trading and Autofollowing

Create your own signals, setting all the parameters in our convenient interface. Signals will be located in your channel, where you can manage and edit them.

- ▶ give signals from a single user-friendly interface
- ▶ edit your signals on the chart
- ▶ get all statistics in one place
- ▶ provide signals for top-15 crypto exchanges

See manuals:

For analyst

For users - Signal trading

Autofollowing

▶ Copytrading

Just trade on your exchange account, your trades will be automatically broadcasted to the users' accounts in proportion to your balance.

- ▶ trade manually or using algotrading tools
- ▶ expand your target audience
- ▶ stop doing monthly reports - all statistics are open
- ▶ reduce your risks - all keys and funds remain with the user

See manuals:

For analyst

For users - Rules

How to set up

▶ Trading Robots

Send signals via API to create your own trading robot.

- ▶ provide signals for robots via API by standard POST requests
- ▶ share your strategy with an unlimited number of followers
- ▶ supply each follower with his own robot in the cloud infrastructure

See manuals:

For users - How to set up
